Preliminary Amendment in §371 Application of PCT/JP03/12078

Page 2

**Amendments To The Specification:**

On page 1, please insert, after the title, the paragraph, as follows:

**CROSS-REFERENCE TO RELATED APPLICATION(S)**

This application is a §371 application of copending international patent application PCT/JP03/12078 which was filed on September 22, 2003, which is incorporated by reference.

Kindly amend the paragraph beginning at page 6, line 9, as follows:

In the biaxially oriented polyester film for window application according to the present invention, radical trapping agent and/or other additives may be allowed to exist with the said dyes in the coextruded intermediate layer, but their addition would be confined within limits not causing cloudiness of the film and keeping the haze in the ~~above~~following-defined range.

Kindly amend the paragraph beginning at page 26, line <sup>8</sup>7 from the bottom of the page, as follows:

**Examples 2-5 and comparative examples 1-5:**

Films of ~~Examples 1 to 8~~Examples 2-5 and Comparative Examples 1-5 were made in the same way as in Example 1 except that in the polyester production in example 1, the polyester A to copolyester C ratio in the intermediate layer and the coating solution used for forming the resin layer containing the metal-added metal oxide particles or the metal oxide particles were changed as shown in Table 1 below.
